Would you like to be part of a fast-moving SaaS team?

Would you like the flexibility to work remote?

If the answers are YES!, this job may be for you.

We are searching for a strategic and inquisitive Senior Data Scientist to develop and run with data-centered projects. In keeping with this overarching aim, the Senior Data Scientist will be required to outline work requirements, assign tasks to junior staff, and monitor performance within the team. You should also harness your mastery of Data Science to consult on various aspects of these and other projects.

To be successful as a Senior Data Scientist, you should use data to ultimately inform and promote the company's expansion, as well as assume a prominent role in the development of your junior team members.

This is the job for you if you are:

-Self-starter with tremendous initiative and work ethic

-Excellent communicator and collaborator with other functional teams

-Desire to be a high-impact player at a product-driven company

-A faster learning that embraces continuous improvement.

-Creative and critical thinking abilities

-Ability to be detail oriented within a high-paced environment

-Passionate about technology

About the Rented - Powered by TravelNet Solutions

Rented is part of the Travelnet Solutions hub. We are a values led, and purpose driven company. Our mission is transforming how hospitality works. We currently do this by strengthening and supporting customers through access to world-class talent, technology, and resources.

The customers we serve are in the difficult position of having to execute in a manual and on-the-ground way in their business, while at the same time competing in an entirely global and digital world. With the products, tools, and services we are building, we can strengthen our customers, and to help them grow in an increasingly competitive industry.

About the Travelnet Solutions

Our mission is transforming how hospitality works. Every day we strive to solve the most difficult technology and workflow challenges, and we collaborate to provide solutions to help our customers in the

hospitality industry become more efficient and profitable. Our goal is to become our customer's business concierge. It all starts with one question; how can we help you?

Our three **Core Values** reflect the behaviors that shape the tone of how we work with each other, our partners, and our customers.

Serve Others: We nurture growth to help others succeed.

Grit: We take ownership and never give up on what matters most.

Create the Future: We innovate to disrupt the status quo.

Why join our winning team?

-We are a growing, fast-moving dynamic team that collaborates with each other in order to achieve continued growth and success.

-We are a portfolio company able to work with our customers to be that one vendor solution for SaaS technology, marketing, and distribution.

-We are reshaping the industry and the way it thinks about technology and service.

-Full medical dental and vision package

-Unlimited Paid Time Off

-Health Savings Account with up to a $2,000 annual match

-Flexible work environment

-Free life insurance and Long Term Disability

-Free Lunch on Mondays either in Cottage Grove or through Door Dash

-Complimentary Door Dash Pass account

-Availability of Flex Spending Accounts

-Retirement with employer match

-Free snacks and soda in the office

-Competitive wages

-Work with an amazing team

Do these responsibilities describe what you like doing?

● Formulating, suggesting, and managing data-driven projects which are geared at furthering the business's interests.

● Collating and cleaning data from various entities for later use by junior team members.

● Monitoring the performance of junior team members and providing them with practical guidance, as needed.

● Selecting and employing advanced statistical procedures to obtain actionable insights.

● Working closely with our in-house Revenue Management team to garner practical insights and suggesting ways in which insights obtained might be used to inform business strategies.

● Staying informed about developments in Data Science and adjacent fields to ensure that outputs are always relevant.

What are some must-haves?

● Advanced degree in Data Science, Statistics, Computer Science, or similar.

● Extensive experience as a Data Scientist.

● Proficiency in R or Python, with at least a basic understanding of R.

● In-depth understanding of SQL.

● Competent in machine learning principles and techniques.

● Demonstrable history of devising and overseeing data-centered projects.

● Ability to relay insights in layman's terms, such that these can be used to inform business decisions.
